AIR SOFT GUNS AND
ACCESSORIES**
VOLUME 8

EVOLUTION

STYLE. SOPHISTICATION. PERFORMANCE.

The most fascinating and valuable Air Soft Weapons in the world are the result of commitment in competition. Evolution represents the purest expression of refined technique, unmistakable design and passion for Air Soft.

Evolution is innovation and new technologies development oriented. Our products are known all over the world due to their shooting performance and excellent workmanship.

Our Electronic Trigger System, entirely designed, developed and produced in Italy and our constant develop of both technical and visual aspects, are the distinctive signs that affirm the uniqueness of Evolution, which mission is guarantee customers a real competitive advantage and the best game experience ever.

Evolution International S.r.l started its business two decades ago as sole distributor of the major and most respected brands in the Air Soft industry. It soon entered into worldwide exclusive agreements with real gun manufacturers in order to be able to produce official firearms replicas.

All guns go through a strict testing and inspection process in Italy.

Every single function is verified by skilled technicians.

GUNS DESIGNED IN ITALY

TESTING AND INSPECTION

The first line of guns entirely developed and manufactured in Italy by Evolution International S.r.l.

The testing results of each gun are recorded in our database.

THE HARD CORE SERIES

TOP PERFORMANCE, SUPER REALISTIC AIR SOFT GUNS DESIGNED FOR THE PROFESSIONAL USERS. FULLY LICENSED, ARE DELIVERED WITH LUXURY GRADE PACKAGING AND A MULTI LANGUAGE MANUAL.

HARD CORE series

The Hard Core Series are the top-class products within the Evolution products family. The Hard Core Series guns are designed to meet the demand for superior-quality products coming from professional airsoft players looking for performance and ultimate realism.

For their sophisticated technical features the Evolution Hard Core Series guns are the state of the art in the airsoft industry. The ultimate realism, perfect finishing and attention to details make the Hard Core Series the most wanted item also by collectors.

TangoDown ENHANCED COMBAT RIFLE

EVOLUTION HAS ENTERED IN A WORLDWIDE EXCLUSIVE LICENSING AGREEMENT WITH TANGODOWN® INC. AND IS PROUD TO BRING TO THE AIR SOFT WORLD THE REPLICAS OF THE TANGODOWN ECR (ENHANCED COMBAT RIFLE).

TangoDown® Inc. enjoys over ten years of bringing the highest quality products to United States Armed Forces and Law Enforcement.

Their reputation for unique design and quality manufacturing of weapon components has earned them first choice when it comes to stepping into arms way.

TangoDown® constantly shoot, train and listen to operator's needs.

Their goal is to make the warrior's weapon lighter and more efficient, whether a pistol, carbine or belt fed machine gun.

BUILT-IN MOSFET UNIT

The Mosfet Unit increases the duration and reliability of the trigger switch eliminating the problems caused by the "electric arc" which is typical of standard trigger unit designs. At the same time the more efficient electric flow management increases the Rate of Fire.

As it is standard on any Evolution gun all internal components are pre-upgraded, all key parts like the outer barrel are made of one piece cnc machined from billet, and the realism and attention to details is pushed to the next level.

TangoDown A NEW TYPE OF GEAR BOX

With the TangoDown ECR series Evolution introduces a new type of gearbox in their products line. The new gearbox comes standard with an Integrated Mosfet

Unit and Quick Removable Spring Guide. The Quick Removable spring guide, which is accessible in seconds by simply removing the buffer tube, allows the immediate access to the main spring without the need of taking out the gearbox from the receiver.

ADC Armi Dallera Custom ITALIAN BLACK RIFLE

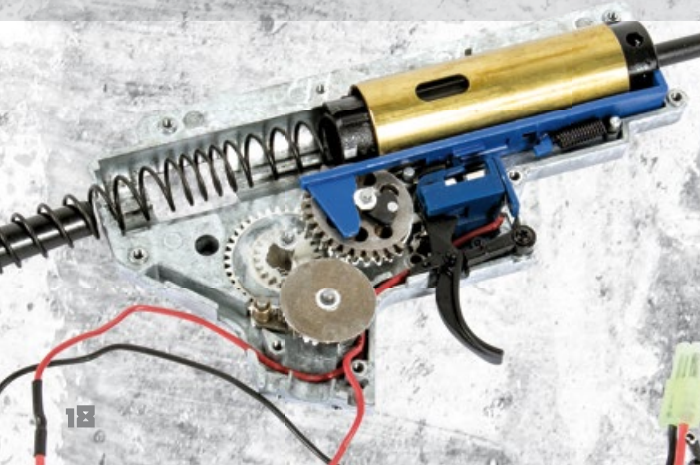

francesca_carrera

**IF YOU ARE LOOKING FOR
THE BEST IN GUNS MAKING
YOU HAVE FOUND THE RIGHT
COMPANY.**

ADC Armi Dallera Custom S.r.l. is a leading European manufacturer of custom guns, born from the needs to produce high precision handguns for those professional and non professional users who are looking for the maximum performance possible from a firearm. At ADC all workings are hand-made and have one only goal: ensure the maximum shooting accuracy.

ADC Armi Dallera Custom A SURE INVESTMENT THROUGH THE TIME

Couplings with near to zero tolerances, top quality materials and a touch of genius, the ADC weapons can achieve incomparable results, impossible to obtain from standard mass-produced firearms. The ADC production ranges from race pistols to self defense handguns and tactical weapons for special duties. The choice is up to you! If you want something really special, you have found the right place.

In 1987 started the professional career of Roberto Dallera, the founder of ADC: custom gunsmith maker of sporting, competition and defensive handguns.

A true new job, not only in Italy but also in the rest of Europe, where the gunsmith work was at that time confined only to rifles and shotguns, mostly without improving the performances. The 1990 was the breakthrough year, when it was founded the ADC Armi Dallera Custom as a manufacturer of custom designed handguns for defensive and sporting purposes, the very first European pistols custom maker. Year by year the range of guns produced evolved, due also to the contribution of Cristian Dallera, Roberto's son, and his passion for tactical firearms. Today ADC Armi Dallera Custom is the leading and most prestigious manufacturer of Italy, of special firearms based on the AR15 platform.

ARMI DALLERA CUSTOM

SERIES

ADC

HARD CORE SERIES

**IT IS FROM THE COOPERATION BETWEEN EVOLUTION
AND ADC ARMI DALLERA CUSTOM THAT THE WORLD
OF AIR SOFT AND REAL GUNS MET TOGETHER
BRINGING TO LIFE THE ADC PROFESSIONAL AIR
SOFT GUNS SERIES.**

**BUYING AN ADC GUN BECAME A SURE INVESTMENT
THROUGH THE TIME.**

The ADC brand is now synonymous of high quality, prestigious firearms built with high-grade components with extremely low tolerances, both in the classical, competition and tactical models.

stefanoice_

LR-300 RDS STOCK

The Rapid Deployment Stock (RDS) is one of the main features of the LR-300 and one of the main differences between an LR-300 and a traditional AR style rifle. The smooth action of the real stock has been faithfully reproduced and the airsoft stock unfolds using just

one hand like the real one, allowing the tactical carry of a very compact gun and a rapid one-hand unfolding movement when immediate action and rapid target acquisition is required.

The LR-300 RDS stock is fully foldable and five length positions adjustable, making the LR-300 the most versatile AR style gun ever made.

THE EVOLUTION HARDCORE SERIES LR-300 IS THE OFFICIAL AIR SOFT REPLICA OF THE REAL LR-300, PRODUCED UNDER WORLDWIDE EXCLUSIVE LICENSE GRANTED TO EVOLUTION INTERNATIONAL S.R.L. BY Z-M WEAPONS, U.S.A.

The LR-300 features exactly the same logos and trademarks as the real gun counterpart whose design has been accurately reproduced in the airsoft version using the real gun blueprints and taking measurements directly on the real LR-300. We can easily say that the Evolution LR-300 is the most detailed and realistic airsoft replica today available on the market.

LR-300 GEAR BOX

LR-300 ELECTRIC BLOWBACK

In order to make possible the use of a fully folding stock on an AR style rifle, Z-M Weapons modified the traditional Stoner design shortening the bolt-carrier and relocating the recoil spring over the barrel, allowing to completely remove the buffer tube (DIGS System). This feature has been fully

The Evolution Hardcore Series LR-300 is equipped with a mechanically advanced reinforced gearbox which is based on a patented design with the extra addition of the strongest and most durable piston today available, featuring steel metal teeth for unmatched durability under high-stress conditions.

The reinforced steel gears run on strong and durable oversized 9mm steel ball bearings and a new designed tappet plate ensures smooth operation at high rate of fire.

The LR-300 is LiPo ready.

replicated in the Evolution LR-300 featuring a working replica of the DIGS System which is integral part of the electric powered Blowback System. During the blowback action the bolt carrier, the gas-system and recoil spring placed over the barrel, blowback adding an unparalleled realism. The Blowback System is

two positions adjustable for two levels of recoil intensity and rate of fire. In the LR-300 the realism is pushed to the ultimate level, the field-strip system of the blowback mechanism has been fully replicated allowing the user to access and disassemble it just like the real gun.

DESIGNED AND MADE IN ITALY

E.T.S.™ ELECTRONIC TRIGGER SYSTEM

Before its release in almost 2 years of development it went through a number of improvements and modifications from its original design and the version we are now releasing is actually **the Third Generation** with several hardware improvements and V5.2.3 software run by our very powerful CPU and supported by our Oversized Mosfet Unit™.

With the E.T.S.™ you can easily program how your gun will shoot, you'll be able to program your rifle to shoot a burst of 3 BB's or any other number of BB's from 1 to 250, this means you'll also be able to set your gun to be semi auto only or to limit the amount of BB's shot with one trigger pull to simulate the use of low capacity magazines, it is up to you to decide, the software doesn't give you any limitation.

With the E.T.S.™ your Lipo battery is safe, no more damages, no more balloon as the result of over-discharging. The E.T.S.™ incorporates a programmable Lipo Protection function, you can protect your 7.4V, 11.1V or even 14.8V batteries!

Returning to the gun's standard operation is as easy as program it. Replacing your standard trigger with the Evolution's E.T.S.™ you'll also say good-bye to the burned switches problem as the current will flow through a very powerful **Oversized Mosfet Unit™** that can be placed inside the buffer tube or even inside the gearbox as its design has been optimized to be very compact.

The E.T.S.™ is sold as a complete unit with the Oversized Mosfet™ and everything you need to install it, or alone, in case your gun already has a mosfet installed, as the E.T.S.™ software is capable to drive also third party mosfets.

THE E.T.S.™ IS EASY TO INSTALL AND EASY TO PROGRAM, DETAILED INSTRUCTIONS ARE PROVIDED WITH THE PRODUCT. UNEXPERIENCED USERS ARE SUPPORTED BY ON-LINE TUTORIALS.

E.T.S. + OVERSIZED MOSFET DROP-IN CONFIGURATION

TECHNICAL SPECS

E.T.S.™ ELECTRONIC TRIGGER SYSTEM

- Programmable burst 1-250 shots
- Digital trigger switch
- Digital cut-off sensor
- Digital safety
- Shortened trigger stroke
- Operating tension 7.4V - 14.8V
- Programmable Li-Po protection function 2-3-4 cells
- Compatible with any Mosfet

OVERSIZED MOSFET UNIT™ FULL SET

- Higher rate of fire
- Faster trigger response
- No battery drain
- Over engineered Mosfet Unit
- Compact size, can be placed inside the gear box
- Drop-in installation on most V2 gearboxes
- Operating tension 7.4V - 14.8V

ELECTRONIC TRIGGER SYSTEM

TAKE YOUR GUN
TO THE **NEXT LEVEL**

DESIGNED AND MADE IN ITALY

CONFIGURABLE FIRE SELECTOR

Assign independently to the SEMI and AUTO positions one or more functions for 10 different combinations, each of them programmable with independent values for a virtually infinite possibilities of different configurations:

- SAFE - SEMI - AUTO
- SAFE - SEMI - SEMI
- SAFE - SEMI - BURST
- SAFE - SEMI - BURST/AUTO
- SAFE - SEMI/AUTO - AUTO
- SAFE - BURST/AUTO - AUTO
- SAFE - BURST/AUTO - BURST
- SAFE - BURST/AUTO - BURST/AUTO
- SAFE - BURST - BURST
- SAFE - BURST - AUTO

ADJUSTABLE TRIGGER RESPONSE

Feel the trigger like a real one. This function speeds up the trigger response and shortens the time between trigger pull and BB departure. The gun will be more reactive and you will gain a substantial advantage. The 10 levels of pre-cocking adjustments allow to find your preferred setting for a crisp, immediate and more reactive trigger response.

SMART TRIGGER AUTO-BOOST

This function is automatically enabled when the PWM ROF CONTROL is active. The first shot is at full Voltage and the Rate of Fire reduction is applied only from the second BB. This produces a much faster trigger reaction and the best shooting experience.

BURST MODE

With this function you can set a pre-determined numbers of BB's that will be shot for each trigger pull. You can set your gun to shoot from 1 to 10 BB's with 1 BB increments. You can choose the number you want, you don't have to stick to pre-set numbers. This function can be assigned to the SEMI and the AUTO position independently and a different value can be assigned to each of them, so you may want to shoot a different burst of BB's in SEMI (e.g. 3 BB's) and in AUTO (e.g. 10 BB's), you can also enable this function in SEMI position or AUTO position only.

RAMPING

This function can be enabled in SEMI and AUTO positions while shooting Semiauto or Burst. With the Ramping function active the gun will switch automatically to Full Auto if the trigger is kept pulled after the last shot. If you are shooting Semiauto after the shot the gun will switch to Full Auto, if you are shooting a Burst, after the last shot the gun will switch to Full Auto. You can set 10 different levels of delay between the last Semiauto or Burst shot and the first Full Auto shot.

PRE-COCKING

You can choose 10 levels of spring pre-cocking, after each shot the piston will stop at the desired position pre-cocking the main spring. This produces a much faster reaction when the trigger is pulled.

EXPERIENCE A NEW LEVEL OF PERFORMANCE AND OPEN YOUR MIND TO ENDLESS PROGRAMMING POSSIBILITIES. THE E.T.S. III™ GIVES YOU THE EDGE.

The E.T.S. III™ is a concentrate of high technology, we used the most advanced design and engineering technologies to load a so compact board with a multitude of functions with endless possibilities of combinations while keeping at the same time the whole unit incredibly easy to install for everybody thanks to its real Drop-in design and easy to program without the need of external programming units or link cables. With the E.T.S. III™ all you need is your gun.

E.T.S. III
ONLINE TUTORIALS

EA0263E

E.T.S. III

ACTIVE BRAKE

This function uses the motor as a powerful electromagnetic brake. The breaking power is adjustable on 5 levels and can be deactivated. This function is very useful with high Voltage batteries to avoid double shots, while shooting Semiauto, and the unwanted departure of one or more shots after releasing the trigger while shooting in Full Auto or Burst. This is a very common problem with high voltage batteries and can be totally avoided with the Active Brake function.

FULL CYCLE CONTROL

The sensor behind the sector gear counts precisely the number of gear rotations. When this function is active the gears always complete a cycle even if the trigger is released. If you are shooting Semiauto the gun will complete the shooting cycle even if you apply to the trigger a very limited pressure and if you are shooting in Burst Mode the gun will fire the complete burst even if you release the trigger.

LOW BATTERY WARNING

Over discharging a battery can damage the battery and be dangerous. With this function active if the voltage drops behind the safe level the gun will warn you producing a buzz and vibration any time you shoot. You can set Standard and High protection levels or No protection.

PWM ROF CONTROL

When using high voltage batteries the Rate of Fire may be excessive. That may damage your gun or it may be just unrealistic. With this function you can reduce the Rate of Fire on 4 levels to obtain your desired Rate of Fire. You have freedom to use any type of battery.

AUTO LIPO, LIFE AND VOLTAGE DETECTION

The microprocessor automatically recognize the type of battery used and its voltage. You can freely switch between LIPO and LiFE batteries and different voltage without having to deal with change of settings to re-configure the unit for a new battery.

BATTERY FAILSAFE

This function is automatically activated when the Low Battery Warning is enabled. To avoid over-discharge that may damage the battery the Battery Failsafe function cuts the power if the battery voltage drops further after a number of unattended low battery warnings. You can set Standard and High protection levels or No protection.

THE COMBAT SERIES

HIGH STANDARD SET UP
FOR BEGINNERS AND EXPERIENCED PLAYERS.

COMBAT SERIES

COMBAT series

Extremely high quality, affordable price, latest technology, platform expandable with the Evolution Electronic Trigger System.

Solid as rock: components CNC machined from billet aluminium alloy, super-reinforced internals, Carbontech™ engineering polymer.

The Combat Series rifles have right out of the box what the other brands sell as "upgrades" or "option parts". Don't be surprised to find in these guns a heavy-duty gearbox with a reinforced piston with all teeth made out of steel, steel gears with delayer, a real Quick Access spring guide that allows to swap the main spring in seconds in order to easily adapt the shooting performance to the game as well as the revolutionary tool-less access to the motor compartment and other innovations such as the very accurate rotary hop up chamber.

The Combat Series rifles are the best choice for those wargame players looking for reliable, performing, complete, yet affordable products.

EVOLUTION HARD CASES

The Evolution Hard Cases are made in Italy using the most advanced machinery and high strength polymers to ensure the highest level of protection under any condition.

Whether a real firearm or just an air soft gun with the Evolution Hard Cases your gun is always in the safest place.

Designed and engineered to outperform

Double layer of shock-absorbing foam

High strength polymers

MADE IN ITALY

The new Evolution LIPO ULTRA POWER BATTERIES

EVOLUTION HAS JUST RELEASED ITS NEW LINE OF ULTRAPOWER BATTERIES, AN EXTENSIVE LINE OF HIGH PERFORMANCE BATTERIES DESIGNED FOR THOSE CUSTOMERS WHO DON'T NEED JUST A BATTERY BUT REQUIRE TOP PERFORMANCE IN ANY SITUATION.

www.evolutioninternational.it

Powerful! The new 7.4V and 11.1V LiPo batteries feature compact dimensions but at the same time are very powerful thanks to the high power density. With their 40 C peak discharge they can instantly deliver the current demanded by any type of motor, even on super-tuned air soft guns.

Great choice. The new battery range includes batteries of multiple sizes, shapes and configuration in order to be able to fit any air soft gun on the market.

PARTS AND ACCESSORIES

Explore the Evolution accessories range and discover innovative and unique products like our self lubricant gears, our AK 1000 RD Flash Magazine or the high performance of our made in Italy Power Springs.

WE BELIEVE IN INNOVATION

So when we decided to enter the air soft gun accessories market, we did it starting right from where the others fail, working around those small details that make a part more durable and reliable.

BLACK RIVER™

The Black River™ tactical gear line has been designed to meet the requirements from the professional operators and the demanding Milsim players.

High quality and attention to the details, this is what makes the difference!

The Black River™ products have an higher overall quality compared to the competition, and the small details that make the difference, like the reinforcing stitches all around the laser-cut ports, a small detail that could mean completing or not your mission.
