EVOLUTION

ITALIAN AIRSOFT EXCELLENCE

Evolution represents the purest expression of refined technique and design for Airsoft. Our purpose is to provide unforgettable and smooth experiences to the players.

We pride ourselves on always having the **playerbase in mind** to keep the development of new products always at the top.

The most performing and valuable Airsoft weapons in the world are the result of **Evolution's commitment in innovation.**

Evolution is innovation focused and new technologies development oriented. Our products are known all over the world due to their shooting performance and excellent workmanship.

OUR STORY

Sergio Castelluccia

2009 - Handmade prototype of the LR300, back when 3D printing wasn't available.

Evolution International S.r.l. is the result of a passion born in 1996, year in which **Sergio Castelluccia**, one of the two founders, made of Airsoft his passion. Sergio was part of a very competitive and well known **Airsoft team**, which played at very high levels around Italy. Sergio created the first Italian online **Airsoft blog** which became very popular in those years.

After graduating at the University, Sergio decided to convert **his passion into a job** by involving the co-founder of Evolution in his activity: **Giovanni Castelluccia**, his father. The first intention was to make the Asian brands available on the European market, in a short time, Sergio gained the **exclusive distribution** of very important brands such as Classic Army, Systema and ICS.

Sergio's ambition, however, was to **create his own products**. So, he decided to gradually abandon distribution to devote himself to **production** focusing on those aspects that in his opinion were **neglected by other manufacturers**.

Evolution's path is guided by these core principles that have to be followed: **innovation, technological superiority and out of the box thinking**.

The Shooting range on Evolution International Headquarters.

Sergio Castelluccia during the early days of Evolution International developing a strategy during an airsoft game.

OVER 25 YEARS IN THE AIRSOFT BUSINESS

Sergio decided not to limit himself to the production of replicas but to **design his own rifles**: he hired a famous and specialized Italian real guns designer based in the near Valtrompia (the firearms valley) and started working side by side with him for several months. He developed from the ground up the **Ghost**, an original family of rifles with a very distinctive look **designed in house from scratch**.

Sergio's obsession as an Airsoft player wasn't just about the exterior of an AEG but also the **interior**: thanks to the big steps taken in technological development, that made **miniaturized electronic components** available, it has been possible for Evolution International to start developing its electronic boards. They have gradually evolved up to the **ETS III** Configuration, which are Built-in in all the new Hard Core Series rifles giving freedom to the player to personalize the behaviour of the gun in **endless configurations**.

WHAT WE DO

ITALIAN DESIGN

Quality and design are in our DNA. We have a strong research and development team that leads us to find solutions enriched by a sophisticated design that ensures our products to be immediately recognizable.

QUALITY & PROCESS

All guns go through a strict testing and inspection process in Italy. Every single function is verified by skilled technicians. The results of each gun are recorded in our database.

ASSEMBLY LINE IN ITALY

All Smart Airsoft Guns are assembled in our factory near Milano, Italy by 20+ years experience technicians.

EVOLUTION

ITALIAN AIRSOFT EXCELLENCE

WHAT AIRSOFT PLAYERS SAY ABOUT US

My name is Chris H. I am one of the founders of the Untamed Airsoft Team based in the UK. I recently got to try one of your products and absolutely fell in love with it. I have mainly used ICS and Tokyo Marui in my collection but after looking at the products you have i have purchased a MK18 and I'm really impressed. As a team of 21 we now have 5 Evolution International guns in our arsenal and want more.

Fanstastic company! Great rifs, great selection at a good price. I'm in the UK and the delivery timings are spot on, would definetely recommend ! 10/10

Amazing replicas, luxury finishes, detachable interiors and very good quality/price relationship.

Beautiful and professional brand.

Evolution is the best, pure perfection

My E-416 is fantastic. I'm in love!

Complimenti per i prodotti! In costante miglioramento! Si vede che c'è impegno dietro!

Veramente dei pregiatissimi capolavori Italiani a prezzi incredibili. Grandi ragazzi Bellissime ASG, contento di averli presso il nostro Store , i ragazzi resteranno a bocca aperta

I really like @evolutioninternational for their diligence, feedback and perseverance in achieving their goal. During the time that we have been cooperating, we have learned a lot about each other. It's extremely cool to see a brand grow with you in front of your eyes. For me @evolutioninternationalofficial is an absolute favorite in the market, and it's not just for quality, innovation, etc., but for their humanity and simplicity. Simplicity is one of the best human qualities.

I love Airsoft. Evolution has the best airsoft guns on the market.

Italians do it better!

I fell in love with rifles from this manufacturer.

Grazie di cuore per il supporto, per il vostro brand provo solo amore ed immensa soddisfazione

Daniel
La replica funciona de forma espectacular con bolas 0.28g para el precio que tiene. Muy buena distancia y precision

Great weapons for great hobby!

Good products, good service, good quality and European company, the best for the serious players.

@simonsnugglebunny: Evolution make some of the best looking M4 receivers

Qui si vede rinascere la genialità ed il "saper fare" ITALIANO. Sto acquistando il mio primo Ghost Carbontech e sono sicuro che lo amerò. Bravi ragazzi!

Fantastic product, great reliability and great value for money.

Interesting brand that produces good quality products with a good price!

THE HARD CORE SERIES

The Hard Core series is focused on superior quality products to satisfy professional airsoft players who are looking for performance and ultimate realism. Thanks to its sophisticated technical features, perfect material finishing and attention to details, The Hard Core includes the most advanced items in the airsoft industry. Top performance, super realistic airsoft guns designed for the professional users.

HARD CORE SERIES

HARD CORE SERIES / SMART AIRSOFT GUN

SMART
AIRSOFT
GUNPOWERED BY
E.T.S. III™
ELECTRONIC
TRIGGER
SYSTEM

THE E.T.S. III™ IS THE MOST ADVANCED PROGRAMMABLE ELECTRONIC TRIGGER EVER INSTALLED IN A STOCK AIR SOFT GUN AND IT IS THE EASIEST TO USE.

While other manufacturers install electronic units with very limited basic functions and require to buy additional software to unlock the advanced functions, using PC or apps to program them, the E.T.S. III™ have all the advanced functions out of the box, all you need is your finger as all functions, even the most advanced ones, are programmed via trigger. Fast and easy!

WATCH THE VIDEO

SMART AIRSOFT GUN

EXPERIENCE A NEW LEVEL OF **PERFORMANCE** AND OPEN YOUR MIND TO **ENDLESS** **PROGRAMMING POSSIBILITIES**. THE **E.T.S. III™** GIVES YOU THE **EDGE**.

DESIGNED AND MADE IN ITALY

THE E.T.S.™ HAS BEEN COMPLETELY **DESIGNED**, **MANUFACTURED** AND **QUALITY CONTROLLED** IN ITALY.

SMART TRIGGER AUTO-BOOST

This function is automatically enabled when the PWM ROF CONTROL is active. The first shot is at full Voltage and the Rate of Fire reduction is applied only from the second BB. This produces a much faster trigger reaction and the best shooting experience.

PRE-COCKING

You can choose 10 levels of spring pre-cocking. After each shot the piston will stop at the desired position pre-cocking the main spring. This produces a much faster reaction when the trigger is pulled.

BURST MODE

With this function you can set a pre-determined numbers of BB's that will be shot for each trigger pull. You can set your gun to shoot from 1 to 10 BB's with 1 BB increments. You can choose the number you want, you don't have to stick to preset numbers. This function can be assigned to the SEMI and the AUTO position independently and a different value can be assigned to each of them, so you may want to shoot a different burst of BB's in SEMI (e.g. 3 BB's) and in AUTO (e.g. 10 BB's), you can also enable this function in SEMI position or AUTO position only.

CONFIGURABLE FIRE SELECTOR

Assign independently to the SEMI and AUTO positions one or more functions for 10 different combinations, each of them programmable with independent values for a virtually infinite possibilities of different configurations:

- **SAFE - SEMI - AUTO**
- **SAFE - SEMI - SEMI**
- **SAFE - SEMI - BURST**
- **SAFE - SEMI - BURST/AUTO**
- **SAFE - SEMI/AUTO - AUTO**
- **SAFE - BURST/AUTO - AUTO**
- **SAFE - BURST/AUTO - BURST**
- **SAFE - BURST/AUTO - BURST/AUTO**
- **SAFE - BURST - BURST**
- **SAFE - BURST - AUTO**

ADJUSTABLE TRIGGER RESPONSE

Feel the trigger like a real one. This function speeds up the trigger response and shortens the time between trigger pull and BB departure. The gun will be more reactive and you will gain a competitive advantage. The 10 levels of precocking adjustments allow to find your preferred setting for a crisp, immediate and more reactive trigger response.

RAMPING

This function can be enabled in SEMI and AUTO positions while shooting Semiauto or Burst. With the Ramping function active the gun will switch automatically to Full Auto if the trigger is kept pulled after the last shot. If you are shooting Semiauto after the shot, the gun will switch to Full Auto. If you are shooting a Burst, after the last shot the gun will switch to Full Auto. You can set 10 different levels of delay between the last Semiauto or Burst shot and the first Full Auto shot.

FULL CYCLE CONTROL

The sensor behind the sector gear counts precisely the number of gear rotations. When this function is active the gears always complete a cycle even if the trigger is released. If you are shooting Semiauto the gun will complete the shooting cycle even if you apply to the trigger a very limited pressure. If you are shooting in Burst Mode the gun will fire the complete burst even if you release the trigger.

LOW BATTERY WARNING

A battery over-discharge can damage it and be dangerous. While low battery warning function is active, once the voltage drops behind the safe level, the gun will warn you producing vibration any time you shoot. You can set Standard and High protection levels or No protection.

PWM ROF CONTROL

When using high voltage batteries the Rate of Fire may be excessive. That may damage your gun or it may be just unrealistic. With this function you can reduce the Rate of Fire on 4 levels to obtain your desired ROF. Feel free to use any type of battery.

BATTERY FAILSAFE

This function is automatically activated when the Low Battery Warning is enabled. To avoid an overdischarge that may damage the battery, the Battery Failsafe function cuts the power if the battery voltage drops further after a number of unattended low battery warnings. You can set Standard and High protection levels or No protection.

ACTIVE BRAKE

This function uses the motor as a powerful electromagnetic brake. The breaking power is adjustable on 5 levels and can be deactivated. This function is very useful with high Voltage batteries to avoid double shots, while shooting Semiauto, as well as with the unwanted fire of one or more shots after releasing the trigger while shooting in Full Auto or Burst. This is a very common problem with high voltage batteries and can be totally avoided with the Active Brake function.

AUTO LIPO, LIFE AND VOLTAGE DETECTION

The microprocessor automatically recognizes the type of battery used and its voltage. You can freely switch between LIPO and LIFE batteries and different voltage without having to deal with change of settings to re-configure the unit for a new battery.

THE COMBAT SERIES

The Combat Series rifles are the best choice for those wargame players looking for reliable, performing, complete and affordable products.

Don't be surprised to find in these guns a heavy-duty gearbox with a reinforced piston with all teeth made out of steel, steel gears with delayer, a real Quick Access spring guide that allows to swap the main spring in seconds, in order to easily adapt the shooting performance to the game as well as the revolutionary tool-less access to the motor compartment and other innovations such as the very accurate rotary hop up chamber.

EVOLUTION

EXPERIENCE A NEW LEVEL OF **PERFORMANCE** AND OPEN YOUR MIND TO **ENDLESS** PROGRAMMING POSSIBILITIES. THE **E.T.S. II™** GIVES YOU THE EDGE.

DESIGNED AND MADE IN ITALY

THE E.T.S.™ HAS BEEN COMPLETELY **DESIGNED**, **MANUFACTURED** AND **QUALITY CONTROLLED** IN ITALY.

ACTIVE BRAKE

Two powerful AB Mosfets use the motor as an electromagnetic brake to stop the gears in the wanted position avoiding double shots and piston bounce when using high voltage batteries. The active brake can be disabled for Speedsoft games.

AUTO VOLTAGE DETECTION

The gun automatically recognizes the batteries Voltage.

AUTO CYCLE CONTROL

The unit stops the piston only after a shooting cycle is completed and always in the same position increasing shooting consistency.

AUTO MOTOR DIAGNOSTIC

The unit constantly check the motor parameters. In case the motor parameters go out of range, the unit enters in Protection Mode to avoid damages, an optical signal and a vibration are activated in order to alert the user.

CONFIGURABLE FIRE SELECTOR

- SAFE - SEMI - AUTO
- SAFE - BINARY TRIGGER - AUTO
- SAFE - 3 BURST - AUTO
- SAFE - SEMI - 3 BURST
- SAFE - SEMI - 5 BURST
- SAFE - SEMI - 3 BURST/AUTO (RAMPING)
- SAFE - SEMI - 5 BURST/AUTO (RAMPING)
- ACTIVE BRAKE OFF/ON
- SNIPER DELAY ON/OFF
- RESET

BINARY TRIGGER

The gun fires one BB when the trigger is pulled and one BB when the trigger is released, enabling the user to shoot in semi auto at double speed. A great feature for Speedsoft games or for those games where full auto is not allowed.

3 BURST SEMI

The gun fires a burst of 3 BB's when the selector is on SEMI.

3 BURST AUTO

The gun fires a burst of 3 BB's when the selector is on AUTO.

5 BURST AUTO

The gun fires a burst of 5 BB's when the selector is on AUTO.

RAMPING FULL AUTO

When the selector is on AUTO the gun fires a burst of 3 or 5 BB's, keeping the trigger pulled, after the burst, the gun switches to full auto and continues firing until the trigger is released. Requires functions 4 or 5 active.

SNIPER DELAY

The gun simulates the use of a bolt-action rifle by enabling a one second break between shots. During the break the optical signal remains active.

LOW VOLTAGE PROTECTION

The battery is constantly monitored and the power is cut-off if the Voltage falls below the security level to avoid overdischarge that may damage the electronic unit.

GHOST²

CARBONTECH SMART AIR SOFT GUNS™

ENTIRELY DESIGNED IN GARDONE VALTROMPIA, ITALY - THE FIREARMS VALLEY WHERE THE **MOST PRESTIGIOUS ITALIAN FIREARM** MANUFACTURES ARE BASED - BY ONE OF THE MOST EXPERTS REAL GUN DESIGNERS SIDE BY SIDE WITH EVOLUTION INTERNATIONAL. THE GHOST DOESN'T HAVE EQUALS ON THE MARKET IN TERMS OF **DESIGN, TECHNOLOGY AND TECHNICAL FEATURES.**

It was presented as a concept at IWA2019 where it captured the attention of the airsoft industry, now the GHOST it's ready to change the rules of the game.
A real unique design that incorporates the mission and vision of the Evolution brand.

SMART AIRSOFT GUN

The GHOST 2 incorporates the Powerful E.T.S.II™, Electronic Trigger System. This advanced electronic control unit has been completely designed, developed and manufactured in Italy by Evolution International's Engineers.

The Ghost 2 Smart Airsoft Gun is the first polymeric Airsoft Gun to be equipped with a so powerful and versatile electronic unit, setting the new industry's benchmark.

EMR™ EVOLUTION MODULAR RAIL

The EMR - Evolution Modular Rail - is the superlight-weight handguard designed in Italy by Evolution International made by CNC Machined billed aluminium and M-LOK compatible.

CARBONTECH™

ULTRALITE BODY

The ultralight body has been designed in Italy by Evolution International and it's made of Carbontech, a space-age engineering technopolymer, for a super durable construction with the lowest weight possible.

COMBAT SERIES

RECON S

THE LINE OF GUNS FOCUSED ON THE LOW WEIGHT CONCEPT.

Making an extensive use of Carbontech technopolymer, we manage to significantly reduce the weight while keeping at the same time the strength and durability at the highest level. Surprisingly light but same Evolution performance.

CARBONTECH™

THE RECON IS AVAILABLE IN MANY DIFFERENT VERSIONS WHICH DIFFERENTIATE EACH OTHER BY THE BARREL LENGTH, RAIL SYSTEM, MUZZLE DEVICE AND COLOR.

BLOW BACK AIRSOFT GUN

USED AS BACKUP OR PRIMARY WEAPON,
OR AS A TRAINER THEY ARE ALWAYS THE RIGHT
CHOICE DUE TO THEIR HIGH LEVEL OF
REALISM AND DEPENDABLE QUALITY.

When we decided to start making handguns, here at Evolution International we started from a blank sheet. We reconsidered the standard manufacturing procedures used by the most in the Airsoft Industry and we adopted a unique manufacturing protocol inspired by the firearms industry. The result is a line of handguns with excellent finish, smooth action, accurate shooting and with a hard kick. Our guns are designed in Italy, hand-fitted by our technicians to minimize the tolerances, tested one by one in our shooting range and packed in an impact-proof Made in Italy Pistol Case.

• NATO

DOUBLE LAYER SHOCK-ABSORBING FOAM

KEEP YOUR GEAR PROTECTED

Each rifle case was created to protect the gun and the accessories inside with a double layer of shock-absorbing foam. The foam keeps the guns and accessories in place when moving, preventing damage and scratches.

The larger cases have four different locking points and a protected name tag to personalize it. The smaller ones have two locking points in the centre with a name tag too.

PISTOL HARD CASES

PROTECT EVERY GUN

Made of the same material and with the same quality as the rifle cases, the pistols one's deserve to be on every player's arsenal. Carry your gun safely and easily, knowing the quality of Evolution is always by your side. With many version to choose from and the security of double layer of shock-absorbing foam inside, your equipment will always be safe.

HIGH STRENGTH POLYMERS

SUPERIOR BUILD QUALITY

The rifle cases are easy to carry and durable thanks to the special material they are made of: a particular type of impact resistant polypropylene with a satin texture.

The Evolution Rifle Hard Cases are made in Italy using the most advanced machinery and high strength impact resistant polymers to ensure the highest level of protection under any condition. Whether a real firearm or just an air soft gun with the Evolution Hard Cases your gun is always in the safest place.

HARD CASES / Rifles

The new rifle cases are signed with our Evolution logo as a guarantee of quality. They are available in various sizes and in two different colors: black and tan version.
