Blowback Airsoft Guns

When we decided to start making handguns, here at Evolution International we started from a blank sheet. We reconsidered the standard manufacturing procedures used by the most in the Airsoft Industry and we adopted a unique manufacturing protocol inspired by the firearms industry. The result is a line of handguns with excellent finish, smooth action, accurate shooting and with a hard kick. Our guns are designed in Italy, hand-fitted by our technicians to minimize the tolerances, tested one by one in our shooting range and packed in an impact-proof Made in Italy Pistol Case.

OPERATIONS TAN
ITEM EPO611-T

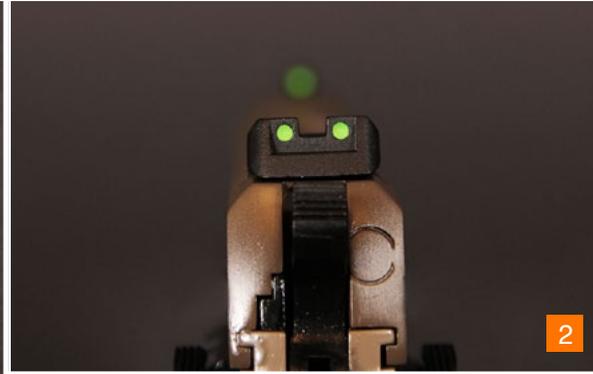

When we started designing the E911 Special Operations we wanted to take the airsoft 1911 platform to the next level. At first glance it is visible the amount efforts we put into this gun which has a unique design although keeping the overall look of a real 1911. The complete CNC processing, the aluminium construction and the Duralite™ finish make of this gun one of a kind.

The shooting experience is of another class. Optimizing tolerances and levers we obtained a trigger action with zero pre-load, a sharp release, a zero over-travel and a fast reset, who knows about real guns understands what we are talking about and how beneficial this kind of set-up is for accuracy and fast double-tap.

The gun is very comfortable and stable in the hand due to the unparalleled ergonomics and perfect center of mass.

The gun is delivered in an impact resistant Made in Italy Pistol Case.

- 1 20MM PICATINNY RAIL
- 2 HIGH VISIBILITY GREEN DOT SIGHTS
- 3 14MM THREADED MUZZLE
- 4 CNC MACHINED REMOVABLE THREAD PROTECTION

ITEM EPO511-T

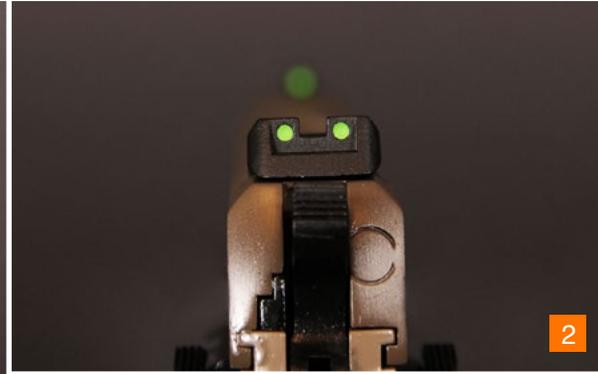

We like being “not standard” and add a bit of our own touch even on the most classics designs. That’s not an easy task when it comes to the 1911 platform which is simply perfect, but we wanted to push it further and we made it adding extra-large CNC machined front serrations. The complete CNC processing, the aluminium construction and the Duralite™ finish make of this gun one of a kind.

The shooting experience is of higher class. Accurately optimizing the components to reduce tolerances and friction we obtained a trigger action with zero pre-load, a sharp release, a zero over-travel and a fast reset, who knows about real guns understands what we are talking about and how beneficial this kind of set-up is for accuracy and fast double-tap.

The gun is very comfortable and stable in the hand due to the unparalleled ergonomics and perfect center of mass.

The gun is delivered in an impact resistant Made in Italy pistol case.

E017 WARRIOR
ITEM EPO117

With the E017 Warrior we made an extensive use of CNC milling machine. We completely changed the angles of the standard slide and added prominent and aggressive serrations that are extended through the whole slide starting from the ejection port to the front sight. The result is a very aggressive and distinctive look and a substantial weight reduction that increases cycling speed due to the reduced reciprocating mass.

To improve the ergonomics and the reloading speed we added an oversized magwell. The Hard Kick Recoil System (HKRS) and realistic weight and take down system contribute to the great feeling this hand gun returns to the shooter.

The gun is delivered in an impact resistant Made in Italy pistol case.

ITEM EPO217-G

The classic design of the E017 well disguises the attention we put to the internal components. The levers and springs are perfectly designed and fitted to delivery a smooth trigger feeling in a double-action gun.

The slide is CNC processed to delivery sharp feeling.

The Hard Kick Recoil System (HKRS) returns to the shooter a strong recoil making this gun quite fun to use. The Carbontech™ polymer used for the frame grants an increased durability. The gun is delivered in an impact resistant Made in Italy Pistol Case.

ITEM EPO317-G

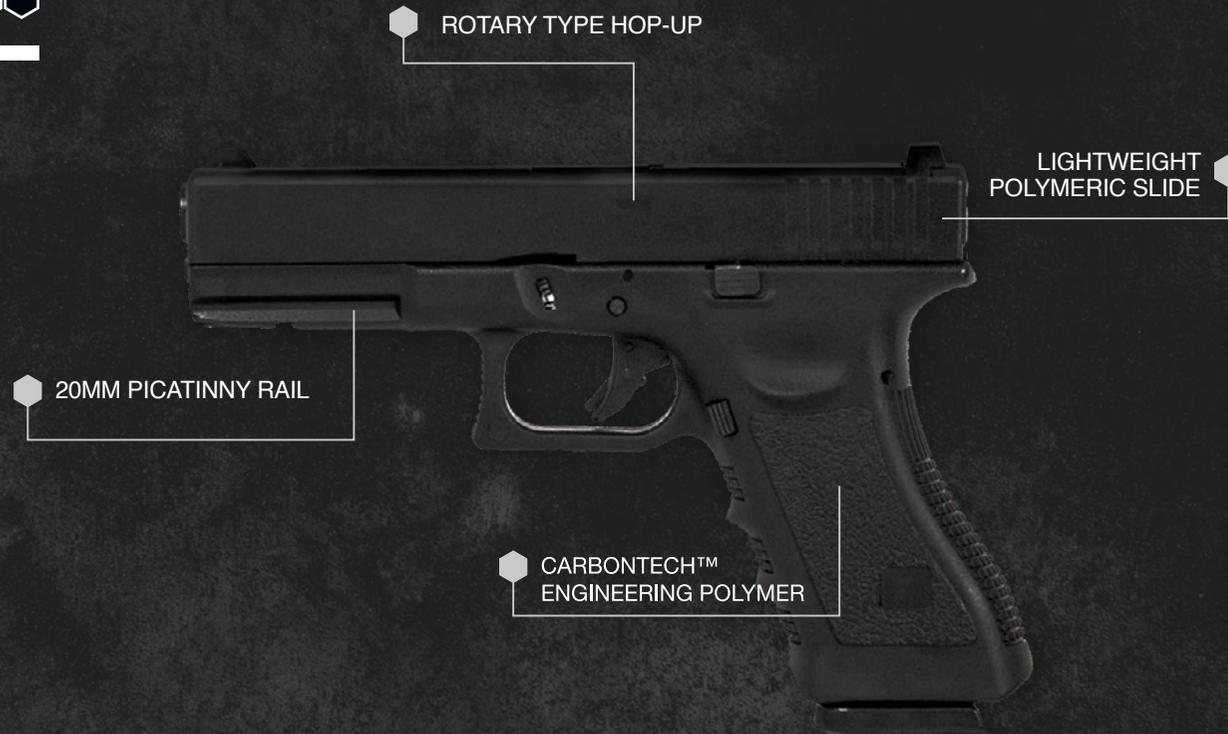

The full polymeric version of the E017 is the go-for gun for cold environment or for those countries where high pressure propellants are not allowed. We replaced the CNC machined aluminium slide with a polymeric one in order to reduce the reciprocating mass which is one of the critical points in the gas blow-back guns. Like the others E017 also the Polymer version takes down like the real counterpart.

1 DESIGNED IN ITALY
Designed from scratch in house using CAD software

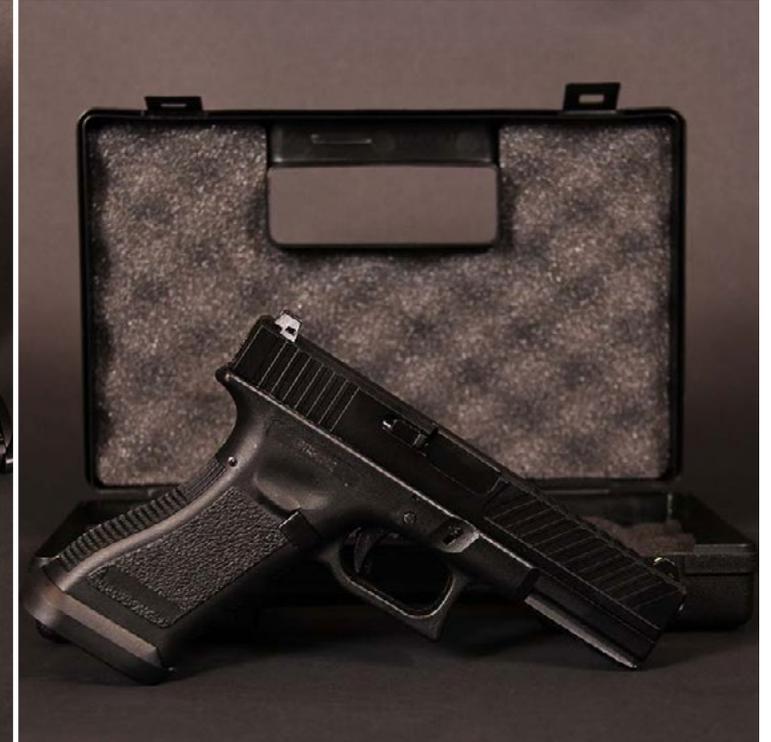

2 ASSEMBLING LINE IN ITALY
The finished product is assembled in our facility in Vimodrone, Milano, Italy

3 PARTS MATCHING
Frames and slides are measured and matched to ensure the lowest tolerance

4 HAND FITTED
All guns are assembled by hand one by one by experienced gunsmiths

5 QUALITY CONTROL
Final inspection and test shooting in our facility in Vimodrone, Milano, Italy

6 PACKAGING
All pistols are carefully packed to ensure safe transportation worldwide

EVOLUTION INTERNATIONAL

Evolution International S.r.l. is a leading player in the Airsoft and recreational shooting industry.

Its commitment to provide customers with the best products and service made Evolution International S.r.l. gain a strong and valuable reputation worldwide.

The Evolution International S.r.l. brands are always associated with high levels of quality and performance.
